 - do Notify red with sound: Sile...
 - if Direction is Rise
 - do Purchase Fall

Arrows point to 'Purchase Rise', 'Purchase Fall', and the 'Direction is' conditions.

Don't change the pointed Sections.

WHEN TO TRADE USING G3 MASSIVE BOT

We trade when the market is highly volatile or when it has a high momentum. In short, we do not trade when the market is in a Major resistance or support points.

HOW TO IDENTIFY A RESISTANCE or SUPPORT POINT

- *Login to Deriv*
- *Go to Deriv Trader Section*
- *Make sure its showing candles*
- *Set Candle Timeframe to 1 Min*
- *Make sure you select the volatility you want to trade.*

When candlesticks are long, it means the market has a momentum but when the candles are small in size, the market is possibly in a resistance zone.

(Learn Support and resistance points in Youtube)

NB: We don't trade when the market is in a resistance or support zone since the Direction of the Chart is being Pulled and Pushed from both sides hence can result to losses.

EXAMPLES OF A GOOD MARKET TO TRADE BASED ON CANDLES

EXAMPLE OF BAD MARKETS. [DO NOT TRADE ON THESE ZONES]

If this doesn't make you understand, You can upgrade your Package to Include an online class or Video.
